TECHNICAL PROFILE

As an Engineering Lead at BT Group, I leverage my extensive experience and skills in Node, Typescript, React, and AWS to build innovative sales journeys on bt.com. I have over three years of engineering leadership experience, including one year at JPMorgan Chase & Co., where I worked on creating a digital platform for web/native apps. I am passionate about performance, quality, and collaboration. I coach, mentor, and pair program with my team members, and drive impactful results with lean software development principles. I also hold two HackerRank certifications in Problem Solving and Node JS, and have expertise in Generative AI and AWS. My goal is to enable teams to build software faster and better, and to deliver value to customers and stakeholders.

PROFESSIONAL EXPERIENCE

Senior Software Engineering Manager 09/2023 - Present

BT Group London Area, United Kingdom

- Engineering Lead for BT Business Broadband SMB, overseeing the Learn-Buy-Get acquisition and renewals journey.
- Architected the front-end framework and adapter pattern for seamless CMS integrations.
